### **DETAILED ACTION**

1. Claims 11-21 are pending in this application.

# Response to Amendment

2. Applicant's amendment filed 04/06/2009 in response to the previous Office Action (12/05/2008) is acknowledged. Rejection of claims 11-22 under 35 U.S.C. § 112, first and second paragraph (items 8 and 9a-9b) has been obviated. The obviousness-type double patenting rejections (items 6-7) have been maintained.

#### Election/Restriction

3. Applicant's election with traverse of a single disclosed species of Example 5: 6-  $(4-\{4-[3-(2-Methoxy-benzyloxy)propoxy]-phenyl\}-piperidin-3-yloxymethyl)-4-(3-methoxy-propyl)-3,4-dihydro-2H-benzo[1,4]oxazine which corresponds to R<sup>1</sup> = [1,4]benzoxazine and Q is absent in the reply filed on <math>10/20/2008$  is acknowledged. The restriction requirement was made FINAL in the previous Office Action (12/05/2008). It is required that applicants amend the definition of R<sup>1</sup> = [1,4]benzoxazine or file a petition for the Restriction Requirement.

# **Double Patenting**

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent

and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 11-21 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 21-33 of copending Application No. 11/887,227. Although the conflicting claims are not identical, they are not patentably distinct from each other because there is significant overlap

Art Unit: 1624

between claims 11-21 of the instant case and claims 21-33 of copending Application No. 11/887,227. Note that the copending case is still a new case and is undergoing preexam processing.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

## Response to arguments

Applicant's argument filed 04/06/2009 has been fully considered but it is not persuasive.

Applicants request that the double patenting rejection be held in abeyance.

6. Claims 11-21 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 9-20 of copending Application No. 12/076,221. Although the conflicting claims are not identical, they are not patentably distinct from each other because there is significant overlap between claims 11-21 of the instant case and claims 9-20 of copending Application No. 12/076,221.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

## Response to arguments

Applicant's argument filed 04/06/2009 has been fully considered but it is not persuasive.

Applicants request that the double patenting rejection be held in abeyance.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

#### Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kahsay T. Habte whose telephone number is (571)-272-0667. The examiner can normally be reached on M-F (9.00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson can be reached at (571) 272-0661. The fax phone number for the organization where this application or proceeding is assigned is (571)-273-8300.
